Test Spec

Test Scenario For Model

- 1 User
 - a. add user
 - b. change user
 - c. search user by username
- 2. Book
 - a add book
 - b. edit book
 - c. delete book
 - d. search book by name
- 3 Recommendation
 - a. make recommendation
 - b. search recommendation by book, from_user
 - c. filter by date
- 4. RecommendShip
 - a. make recommendship
 - b. search by recommendation by to_user
- FriendShip
 - a. send friendship
 - b. change status: accept/expire/decline friendship
 - c. delete friendship
 - d. search by from_user, to_user, status

6. ReadBook

- a. make readbook
- b. search by user, book
- c. filter date

7. Use Model

- a. book to read for a user
- b. books finished for a user
- c. friends for a user
- d. number of reader for a book
- e. friend readers for a book/a user
- f. other readers for a book/a user
- g. pending invitation for a user
- h. worm score
